St Vincent's Hospital, Darlinghurst: Emergency department (ED) overview

April to June 2016

		Same period last year	Change since one year ago
All presentations:[1]	11,504 patients	11,373	1.2%
Emergency presentations:[2]	11,368 patients	11,181	1.7%

St Vincent's Hospital, Darlinghurst: Time patients waited to start treatment[3]

April to June 2016

		Same period last year	NSW (this period)
Triage 2 Emergency (e.g. chest pain, severe burns):	1,353 patients	1,196	
Median time to start treatment[4]	4 minutes	4 minutes	8 minutes
95th percentile time to start treatment[5]	20 minutes	23 minutes	36 minutes
Triage 3 Urgent (e.g. moderate blood loss, dehydration):	5,371 patients	5,207	
Median time to start treatment[4]	13 minutes	13 minutes	20 minutes
95th percentile time to start treatment[5]	81 minutes	80 minutes	92 minutes
Triage 4 Semi-urgent (e.g. sprained ankle, earache):	3,893 patients	3,895	
Median time to start treatment[4]	16 minutes	16 minutes	25 minutes
95th percentile time to start treatment[5]	135 minutes	110 minutes	128 minutes
Triage 5 Non-urgent (e.g. small cuts or abrasions):	464 patients	606	
Median time to start treatment[4]	14 minutes	9 minutes	23 minutes
95th percentile time to start treatment[5]	162 minutes	116 minutes	132 minutes

St Vincent's Hospital, Darlinghurst: Time from presentation until leaving the ED

April to June 2016

		Same period last year	Change since one year ago
Attendances used to calculate time to leaving the ED:[6]	11,504 patients	11,373	1.2%
Percentage of patients who spent four hours or less in the ED	65.3%	65.7%	

* Suppressed due to small number of patients and to protect privacy. Relevant graphs are also suppressed.

1. All emergency and non-emergency attendances at the emergency department (ED).
2. All attendances that have a triage category and are coded as emergency presentations or unplanned return visits.
3. Some patients are excluded from ED time measures due to calculation requirements. For details, see the *Technical Supplement: Emergency department measures, January to March 2016.*
4. The median is the time by which half of patients started treatment. The other half of patients waited equal to or longer than this time.
5. The 95th percentile is the time by which 95% of patients started treatment. The final 5% of patients waited equal to or longer than this time.
6. All presentations that have a departure time.

Note: Presentation time is the earlier time recorded for clerical registration or the triage process. Treatment time is the earliest time recorded when a healthcare professional provides medical care relevant to the patient's presenting problems.

St Vincent's Hospital, Darlinghurst: Time spent in the ED

Percentage of patients who spent four hours or less in the ED

April to June 2016

		Same period last year	Change since one year ago
All presentations at the emergency department:[1] 11,504 patients		11,373	1.2%
Presentations used to calculate time to leaving the ED:[6] 11,504 patients		11,373	1.2%
Percentage of patients who spent four hours or less in the ED	65.3%	65.7%	

Percentage of patients who spent four hours or less in the ED, by quarter, April 2011 to June 2016 †‡

	Apr-Jun 2011	Apr-Jun 2012	Apr-Jun 2013	Apr-Jun 2014	Apr-Jun 2015	Apr-Jun 2016
Patients who left within four hours (%)	52.1%	55.0%	59.8%	66.6%	65.7%	65.3%

* Suppressed due to small numbers and to protect privacy. Relevant graphs are also suppressed.

† Data points are not shown in graphs for quarters when patient numbers were too small.

‡ Caution is advised when interpreting abrupt changes over time at the hospital level. For example, performance before and after transition to a new information system is not directly comparable. For more information see *Background Paper: Approaches to reporting time measures of emergency department performance, December 2011.*

1. All emergency and non-emergency presentations at the emergency department (ED).
2. All presentations that have a triage category and are coded as emergency presentations or unplanned return visits.
3. Some patients are excluded from ED time measures due to calculation requirements. For details, see the *Technical Supplement: Emergency department measures, January to March 2016.*
4. The median is the time by which half of patients started treatment. The other half of patients took equal to or longer than this time.
5. The 95th percentile is the time by which 95% of patients started treatment. The final 5% of patients took equal to or longer than this time.
6. All presentations that have a departure time.
7. Transfer of care time refers to the period between arrival of patients at the ED by ambulance and the transfer of responsibility for their care from paramedics to ED staff in an ED treatment zone. For more information see *Spotlight on Measurement: measuring transfer of care from the ambulance to the emergency department.*
8. The median is the time by which half of patients left the ED. The other half of patients took equal to or longer than this time.
9. The 95th percentile is the time by which 95% of patients left the ED. The final 5% of patients took equal to or longer than this time.

Note: Presentation time is the earlier of times recorded for the start of clerical registration or the triage process. Treatment time is the earliest time recorded when a healthcare professional provides medical care that is relevant to the patient's presenting problems. For patients who were treated and discharged, departure time is the time when treatment was completed. For all other patients, departure time is the time when the patient actually left the ED.

Note: All percentages are rounded and therefore percentages may not add to 100%.

Sources: ED data from Health Information Exchange, NSW Health (extracted 19 July 2016).
Transfer of care data from Transfer of Care Reporting System (extracted 15 July 2016).
