

From March 2017, Hospital Quarterly reports the 90th percentile time, rather than the 95th percentile time, for related ED measures.

## Manning Base Hospital: Emergency department (ED) overview

October to December 2016

All presentations:<sup>1</sup> 7,807 patients  
Emergency presentations:<sup>2</sup> 7,583 patients

| Same period last year | Change since one year ago |
|-----------------------|---------------------------|
| 7,318                 | 6.7%                      |
| 7,257                 | 4.5%                      |

## Manning Base Hospital: Time patients waited to start treatment<sup>3</sup>

October to December 2016

**Triage 2** Emergency (e.g. chest pain, severe burns): 1,333 patients

Median time to start treatment<sup>4</sup>  8 minutes  
90th percentile time to start treatment<sup>5</sup>  20 minutes

**Triage 3** Urgent (e.g. moderate blood loss, dehydration): 2,072 patients

Median time to start treatment<sup>4</sup>  19 minutes  
90th percentile time to start treatment<sup>5</sup>  75 minutes

**Triage 4** Semi-urgent (e.g. sprained ankle, earache): 2,468 patients

Median time to start treatment<sup>4</sup>  29 minutes  
90th percentile time to start treatment<sup>5</sup>  116 minutes

**Triage 5** Non-urgent (e.g. small cuts or abrasions): 1,675 patients

Median time to start treatment<sup>4</sup>  27 minutes  
90th percentile time to start treatment<sup>5</sup>  115 minutes

| Same period last year | NSW (this period) |
|-----------------------|-------------------|
| 1,255                 |                   |
| 7 minutes             | 8 minutes         |
| 10 minutes            | 26 minutes        |
| 2,071                 |                   |
| 23 minutes            | 20 minutes        |
| 112 minutes           | 67 minutes        |
| 2,403                 |                   |
| 34 minutes            | 25 minutes        |
| 156 minutes           | 97 minutes        |
| 1,494                 |                   |
| 37 minutes            | 24 minutes        |
| 144 minutes           | 103 minutes       |

## Manning Base Hospital: Time from presentation until leaving the ED

October to December 2016

Attendances used to calculate time to leaving the ED:<sup>6</sup> 7,807 patients

Percentage of patients who spent four hours or less in the ED  81.9%

| Same period last year | Change since one year ago |
|-----------------------|---------------------------|
| 7,318                 | 6.7%                      |
| 72.9%                 |                           |

\* Suppressed due to small number of patients and to protect privacy. Relevant graphs are also suppressed.

- All emergency and non-emergency attendances at the emergency department (ED).
- All attendances that have a triage category and are coded as emergency presentations or unplanned return visits.
- Some patients are excluded from ED time measures due to calculation requirements. For details, see the *Technical Supplement: Emergency department measures, January to March 2016*.
- The median is the time by which half of patients started treatment. The other half of patients waited equal to or longer than this time.
- The 90th percentile is the time by which 90% of patients started treatment. The final 10% of patients waited equal to or longer than this time.
- All presentations that have a departure time.

**Note:** Presentation time is the earlier time recorded for clerical registration or the triage process. Treatment time is the earliest time recorded when a healthcare professional provides medical care relevant to the patient's presenting problems.

**Source:** Health Information Exchange, NSW Health (extracted 24 January 2017).

From March 2017, Hospital Quarterly reports the 90th percentile time, rather than the 95th percentile time, for related ED measures.

|   | Same period last year | Change since one year ago |
|---|-----------------------|---------------------------|
| All presentations at the emergency department                 | 7,318                 | 6.7%                      |
| Presentations used to calculate time to leaving the ED        | 7,318                 | 6.7%                      |
| Percentage of patients who spent four hours or less in the ED | 72.9%                 |                           |

#### Percentage of patients who spent four hours or less in the ED, by quarter, October 2011 to December 2016<sup>†‡</sup>

\* Suppressed due to small numbers and to protect privacy. Relevant graphs are also suppressed.

† Data points are not shown in graphs for quarters when patient numbers were too small.

‡ Caution is advised when interpreting abrupt changes over time at the hospital level. For example, performance before and after transition to a new information system is not directly comparable. For more information see *Background Paper: Approaches to reporting time measures of emergency department performance, December 2011*.

- All emergency and non-emergency presentations at the emergency department (ED).
- All presentations that have a triage category and are coded as emergency presentations or unplanned return visits.
- Some patients are excluded from ED time measures due to calculation requirements. For details, see the *Technical Supplement: Emergency department measures, January to March 2016*.
- The median is the time by which half of patients started treatment. The other half of patients took equal to or longer than this time.
- The 90th percentile is the time by which 90% of patients started treatment. The final 10% of patients took equal to or longer than this time.
- All presentations that have a departure time.
- Transfer of care time refers to the period between arrival of patients at the ED by ambulance and the transfer of responsibility for their care from paramedics to ED staff in an ED treatment zone. For more information see *Spotlight on Measurement: measuring transfer of care from the ambulance to the emergency department*.
- The median is the time by which half of patients left the ED. The other half of patients took equal to or longer than this time.
- The 90th percentile is the time by which 90% of patients left the ED. The final 10% of patients took equal to or longer than this time.

**Note:** Presentation time is the earlier of times recorded for the start of clerical registration or the triage process. Treatment time is the earliest time recorded when a healthcare professional provides medical care that is relevant to the patient's presenting problems. For patients who were treated and discharged, departure time is the time when treatment was completed. For all other patients, departure time is the time when the patient actually left the ED.

**Note:** All percentages are rounded and therefore percentages may not add to 100%.

**Sources:** ED data from Health Information Exchange, NSW Health (extracted 24 January 2017).  
Transfer of care data from Transfer of Care Reporting System (extracted 24 January 2017).
